

ERRATA to the Environmental Assessment for the
North Fork Calawah Vegetation Management Project
January 8, 2017

The following documents a correction to the North Fork Calawah EA.

On page 326 on the EA under Cultural Resource Inventories heading, replace the second and third paragraphs with the following text:

Survey has been completed, and the results will be documented and submitted to the Washington State Historic Preservation Office for consultation under Section 106 of the National Historic Preservation Act in September, 2017. One eligible property, the Spruce Production Division Railroad Number 1 is located within the project area and will be used during project activities. Brushing, grading, use during haul and light work is considered to be a not adverse effect. Two other historic properties are considered not eligible and no protection is proposed.

The same text should be applied under the same heading in the final Heritage Resource Report on page 5.

Completion of consultation under Section 106 with the Washington State Historic Preservation Office is documented in the North Fork Calawah Vegetation Management project final Decision Notice and Finding of No Significant Impact.
